RE: Site Inspection, Lexco, Inc., ITM Mine, S/047/035,
Uintah County, Utah

Date of Inspection: October 25, 1991, 1991
Time of Inspection: 1520 - 1530
Conditions: Cool, unsettled
Participants: Jim Lekas, Lexco, Inc.; Tony Gallegos,
Holland Shepherd, DOGM

This inspection was a brief side stop en route to the Geokinetics Seep Ridge site, rather than a regularly scheduled inspection.

The site appears to be as described in the original NOI. The surface disturbance does not exceed 2 acres. The layout of equipment and facilities is similar to that used by the other gilsonite operations. Mr. Lekas informed us that the mine is currently active. No processing is performed onsite. The ore is hauled to Lexco's bag plant near Pelican Lake for processing. At this time the Division has no concerns regarding this site.
